Tutu 3GP MPEG Converter

Tutu 3GP MPEG Converter is the best conversion tool that can convert 3GP to MPEG and MPEG to 3GP with perfect quality. This 3GP MPEG program can support batch conversion, just a few clicks, you can convert batches of files between 3GP at a high speed and the output files have as same as good quality with the source file. Furthermore, it allows you to set parameters used by encoder. Free download Tutu 3GP MPEG Converter, all task will be completed in just a few click.

Features of Tutu 3GP MPEG Converter

- Windows VISTA supported well
Tutu 3GP MPEG Converter was developed with standard C++ and windows API, and tested strictly under windows VISTA. So Tutu 3GP MPEG Converter runs perfectly under windows 98/2000/XP/VISTA.
- Perfect solution of 16:9 <-> 4:3 video convert
When convert video between different video scale, it comes up a problem of how to deal with the video size. Tutu 3GP MPEG Converter offer a perfect solution of convert 3GP videos between different video scale whether wide screen 16:9 to normal screen 4:3 or 4:3 to 16:9. You were offered 7 options for choosing. And no matter MPEG to 3GP or 3GP to MPEG.
- Excellent output quality by parameters optimized
If you are a green apple, you can use Tutu 3GP MPEG Converter default settings which were optimized to get excellent output quality of 3GP video. As an experienced user, you can set the advanced settings by yourself like video size, bit rate, frame rate, etc
- Concise and friendly interface
With more concise and friendly interface of Tutu 3GP MPEG Converter, converting your 3GP video files is just a button click away.
- Rational profile
Tutu 3GP MPEG Converter offer rational profiles, this can make you reach the target that you want easily.

Functions of Tutu 3GP MPEG Converter

1. Convert video between 3GP and MPEG
Input video format supported: MPEG and 3GP (3GP, 3GPP, 3G2)
Output video format supported: 3GP, 3GPP, 3G2 and MPEG.
2. Video Screen Crop/Pan
Tutu 3GP MPEG Converter provide a perfect conversion scheme to convert between different video aspect such as 16:9 and 4:3 video, whatever 3GP to MPEG or MPEG to 3GP etc.
3. Batch conversion
Tutu 3GP MPEG Converter can enact every video converting task flexibly, and the task can be saved and load.
4. User-adjustable codec parameter setting
All of the 3GP video codec parameters is optimized and predigested, the default setting can do good job to get good quality 3GP / 3G2 /3GPP video, and you also can set them flexibly to get excellent quality 3G2 / 3GPP / 3GP video files.
5. Output parameters configuration
Output files can be renamed (without extension file name .3gp/.MPEG) and the output path can be easily modified (absolute path).
6. View the information of the original files
You can view the detail information about video codec, video bit rate, frame rate, audio codec, audio bit rate, sample rate etc. of a video file with all file formats.
7. Play video files for preview
You can play video files to be converted in the list for the purpose of preview.

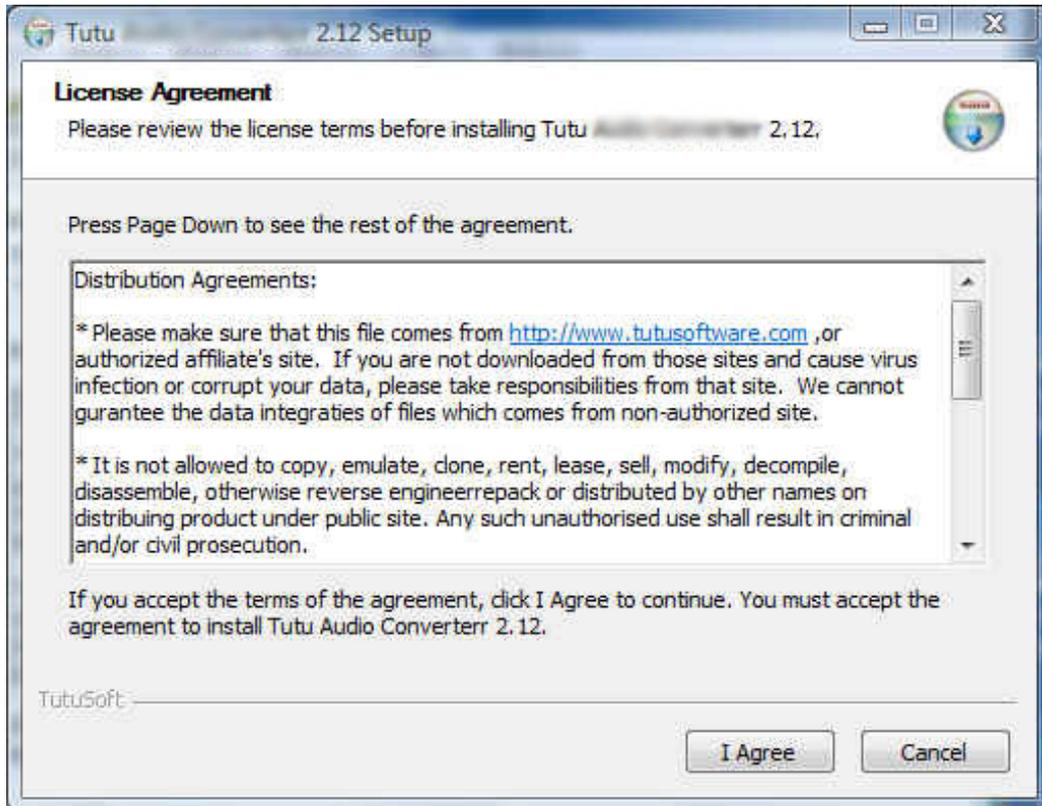

System Requirement

OS Supported:	Microsoft Windows 98/ME/NT4/2000/2003/XP, Windows Vista
CPU:	350MHz or above
RAM:	64MB or above

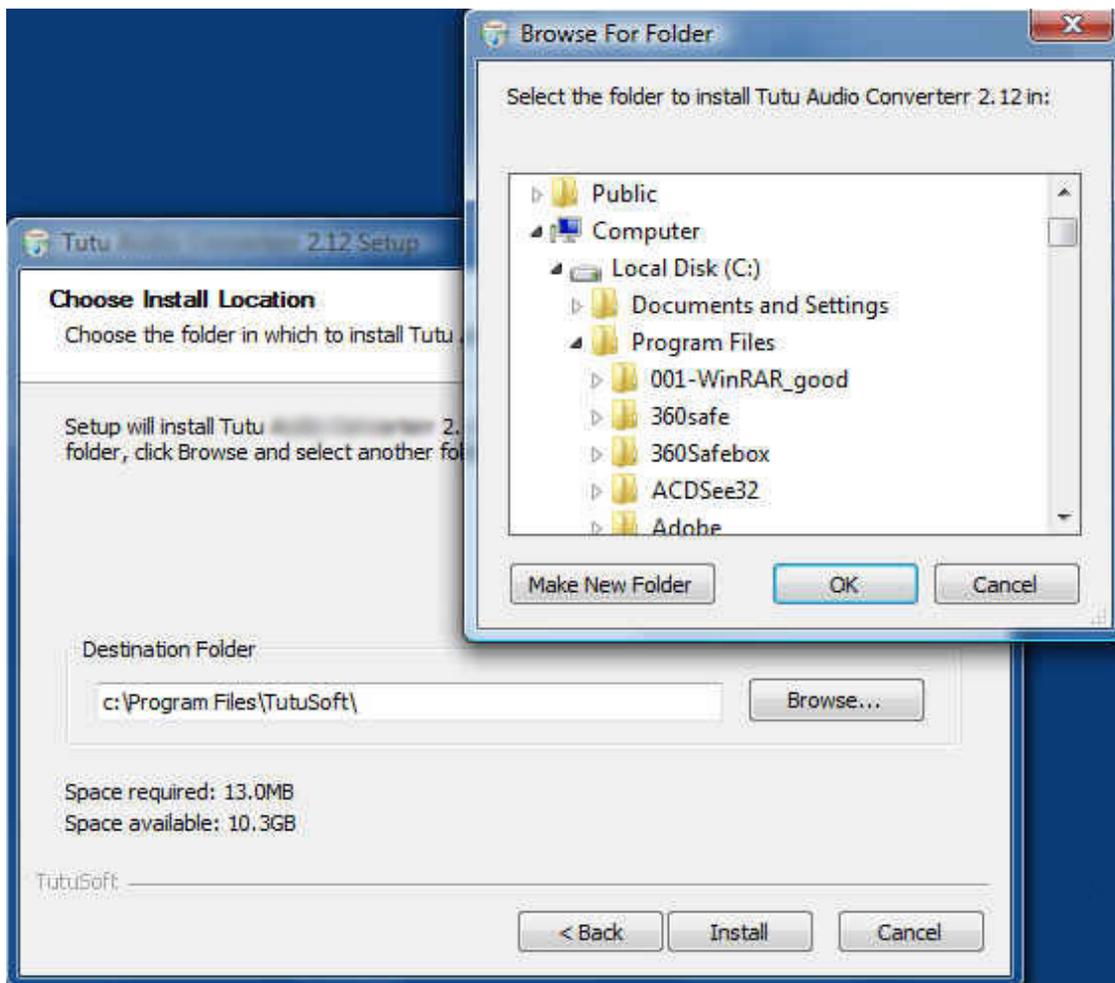

Install or Remove Tutu 3GP MPEG Converter

Install Tutu 3GP MPEG Converter

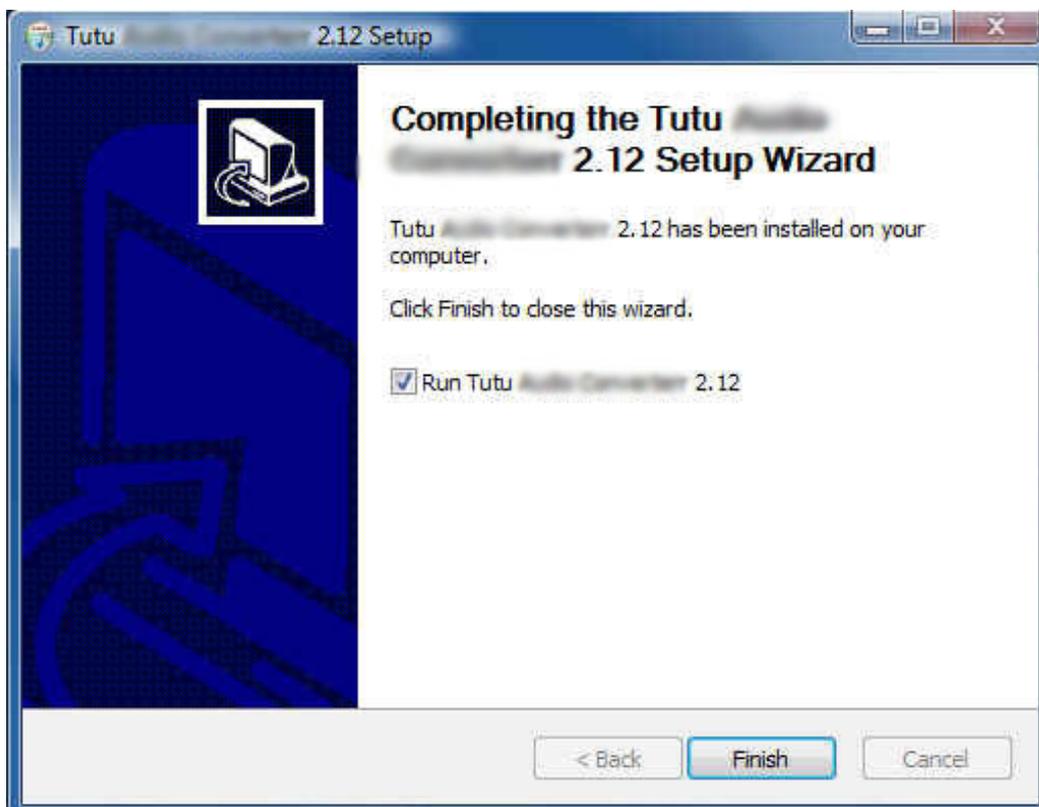

1. Download Tutu 3GP MPEG Converter at <http://www.tutusoftware.com/downloads/t-3gp-mpeg-converter.exe>;
2. Double-click the file "t-3gp-mpeg-converter.exe";
3. Step 1: License Agreement. You should agree the License or the installation will be terminated:

4. Step 2: Choose Destination Folder.

5. Step 3: click "Install" to finish the installation.

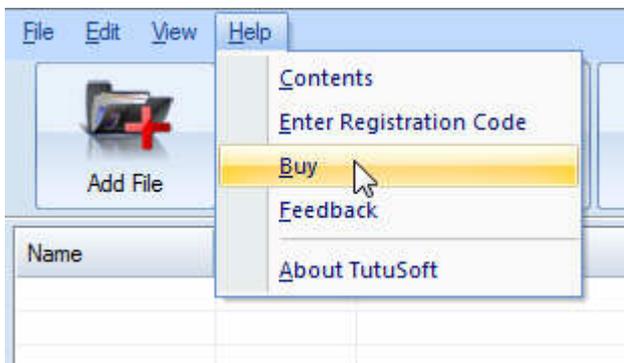

Remove Tutu 3GP MPEG Converter

You can use "uninstall" in the "start menu" or the installed directory. And you can uninstall the software by "Add/Remove program" in "Control Panel".

Buy and Register software

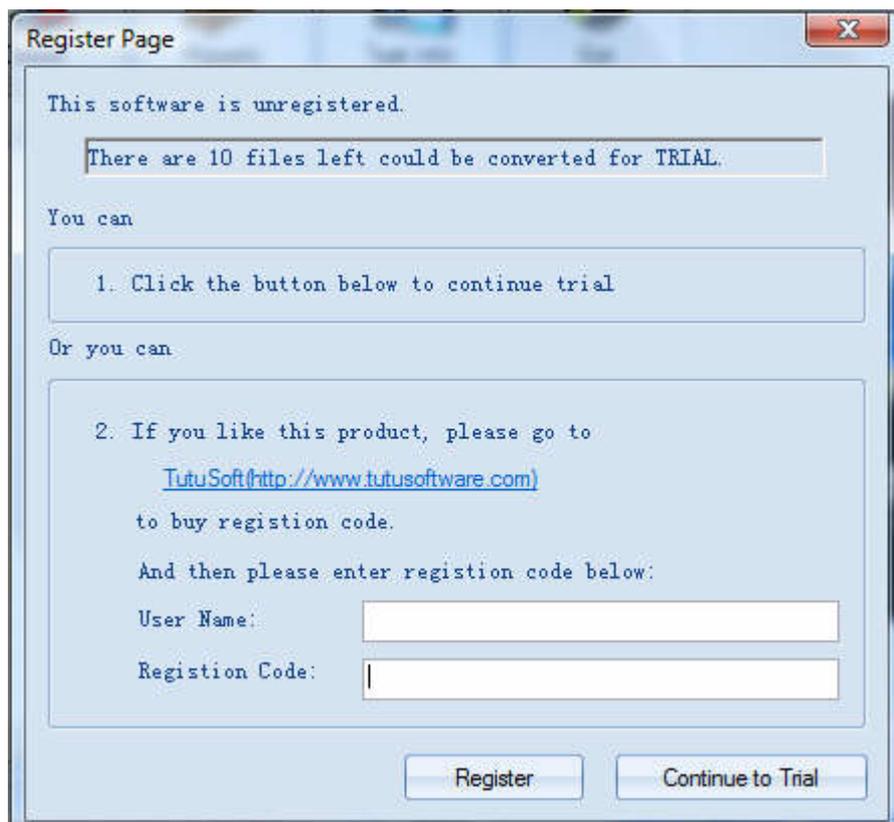

To buy the software

You can go to our website (<http://www.tutusoftware.com>) to buy the software, or you can click "Buy" in the menu of "Help". Then you will get the registration code of the software by email.

To register the software

Click "Enter registration code" in the menu of "Help", and then fill the content of "Register Page" (Registration code will be in your email).

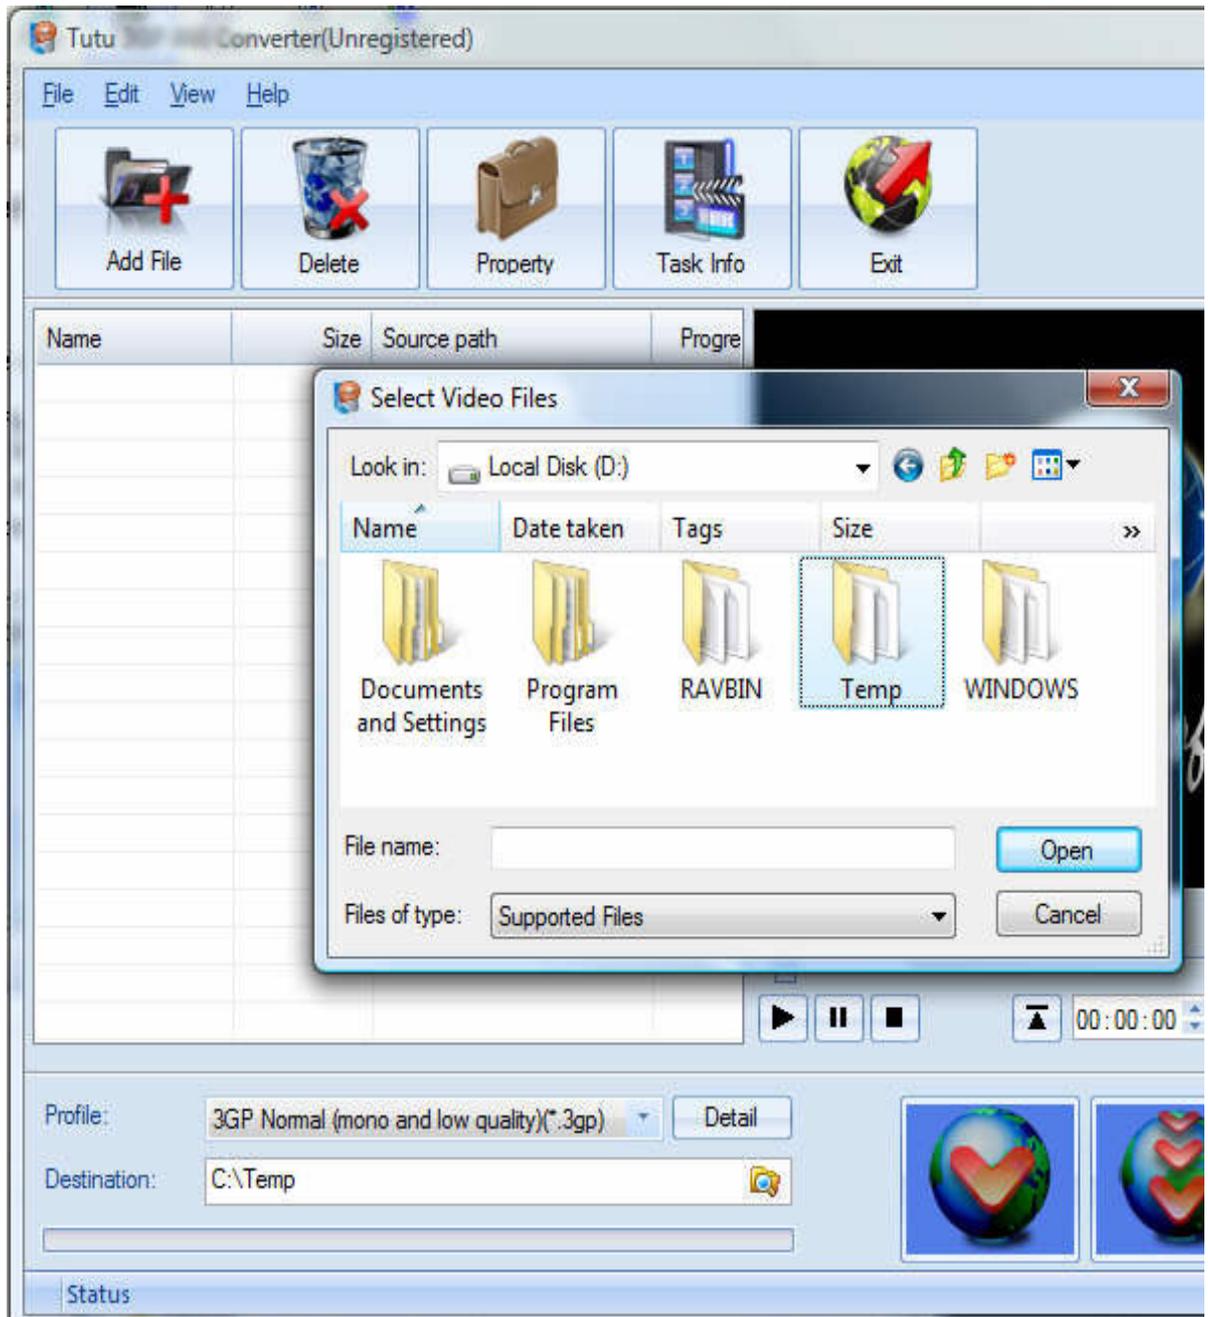

Getting start Converting a Video file

1. Select the files to be converted;

There's three ways to add file

- i. Menu "File" -> "Add file"
- ii. Toolbar button "Add File"
- iii. Drag files to the software file list area

2. Delete and Move up/Move down

To delete a file in the list, just choose the file, click "Delete" button or push the "Delete" key in the keyboard. "Move up" and "Move Down" are designed for adjusting the position in the list. The top one will be converted first

3. Output Setting: Profile and Destination

Choose a Profile, that is the format you want to convert, and choose the destination path in "Output" area of the setting see "[Adjust Output Quality](#)".

4. Screen Crop/Pan

When convert video between 16:9 and 4:3 video, you have some choices. The details see "[Screen Crop / Pan](#)".

5. Start converting

When all files that to be converted were done configuration, just click "Convert All " to convert all audio files in th Selected" to convert the audio file that was selected, and wait for a while(taken time depends on converted files i

Adjust Output Quality

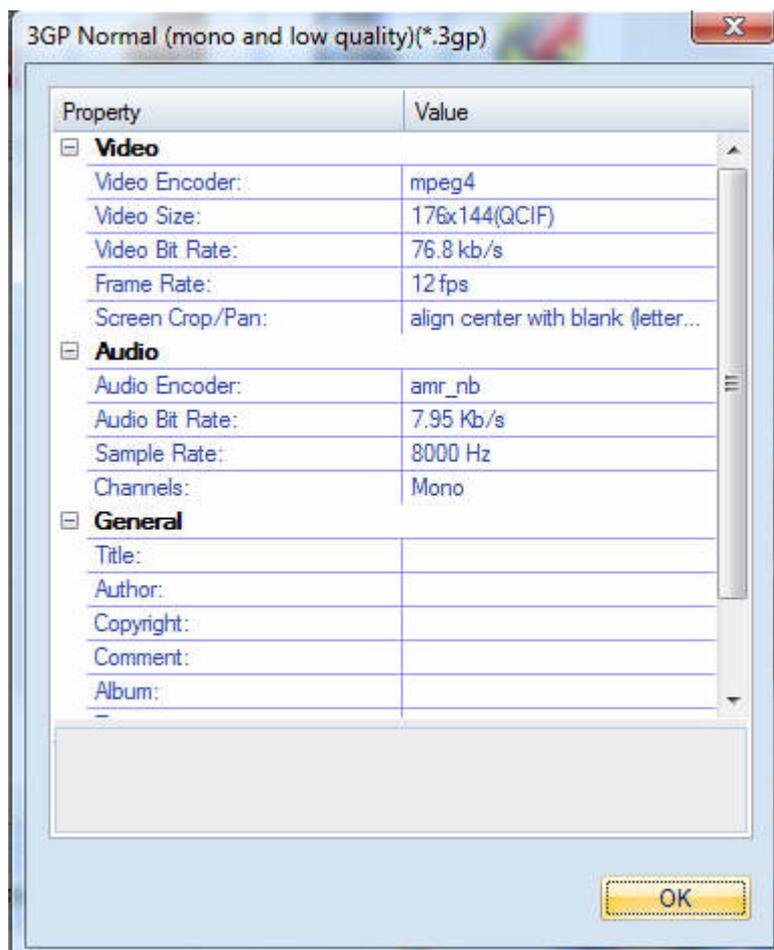

In the main interface of the software, there's an area named "Output". It's to config the output in three aspects:

1. Profile choosing

You can choose a profile to do the basic output converting config. And all of the video / audio codec parameters is optimized and predigested, the default setting can do good job.

2. Video / Audio detail config

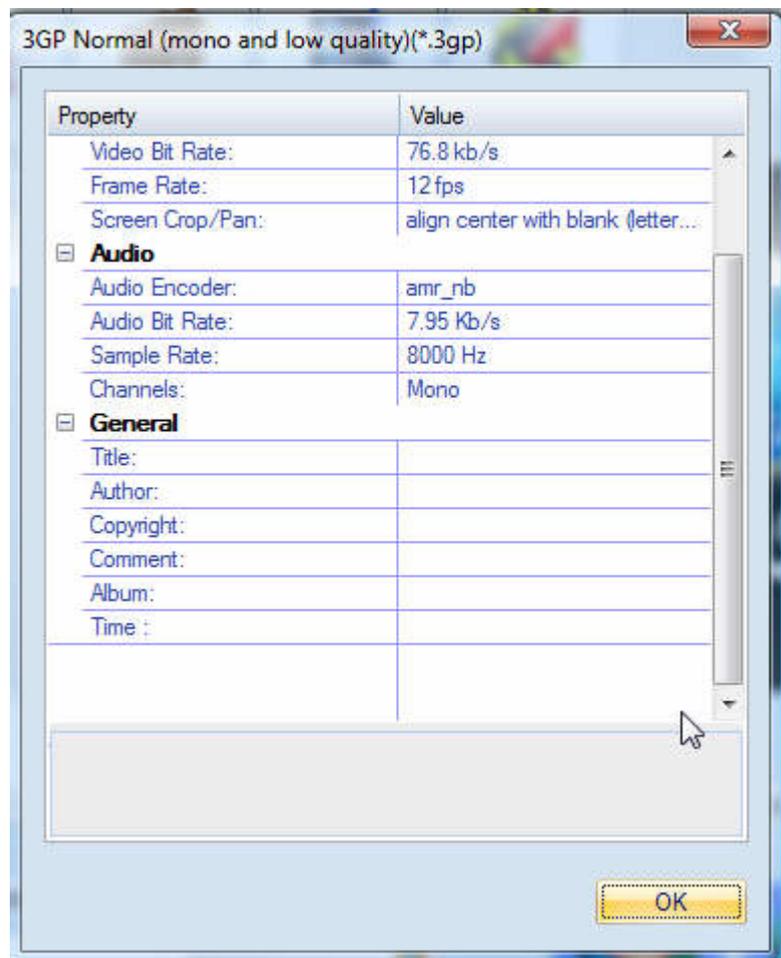

you can do the advanced settings by yourself like video size, bit rate, frame rate, etc. in this section.

So, you can adjust their video / audio parameters by yourself. And every option of these parameters was tested and configed well by us to make all this easy to you.

Set general info of output file

You can select the directory that you want the output files be, and set some general info for the file such as: title, author, time etc.

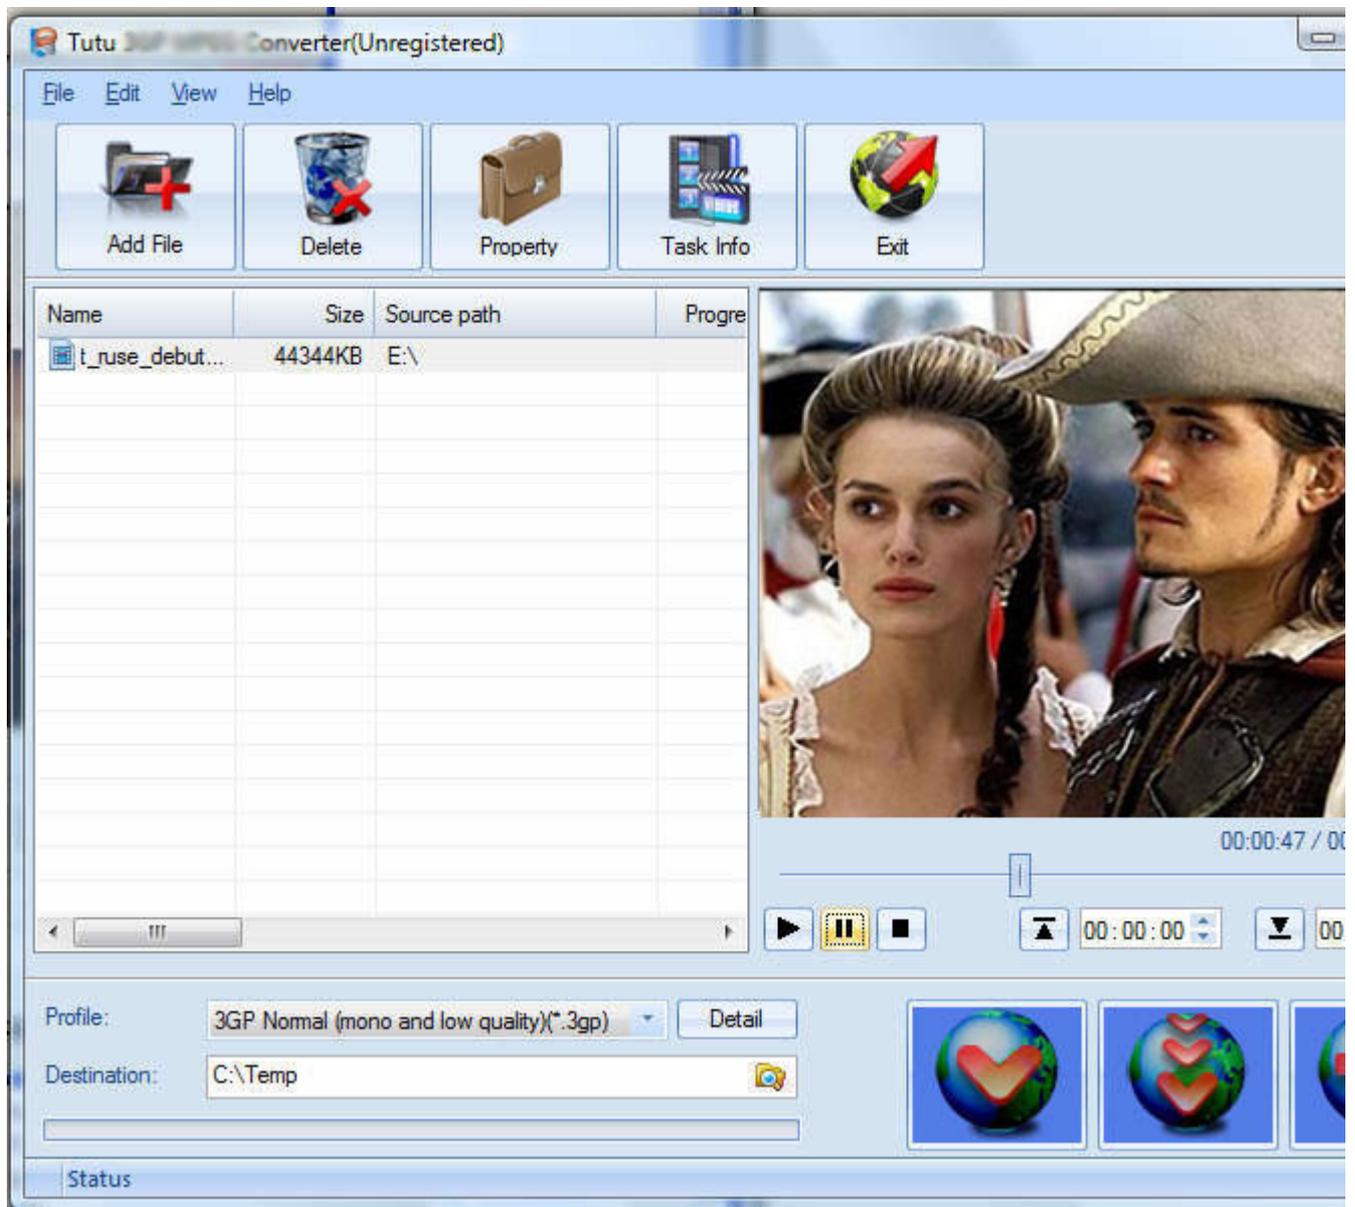

Destination choosing

Click "Explore" to select the directory that you want the output files be.

NOTE: The output file's main file name is the same to the source file by default. If you repeat converting the same file, in the same directory will create files named by adding suffix 1, 2,3 etc.

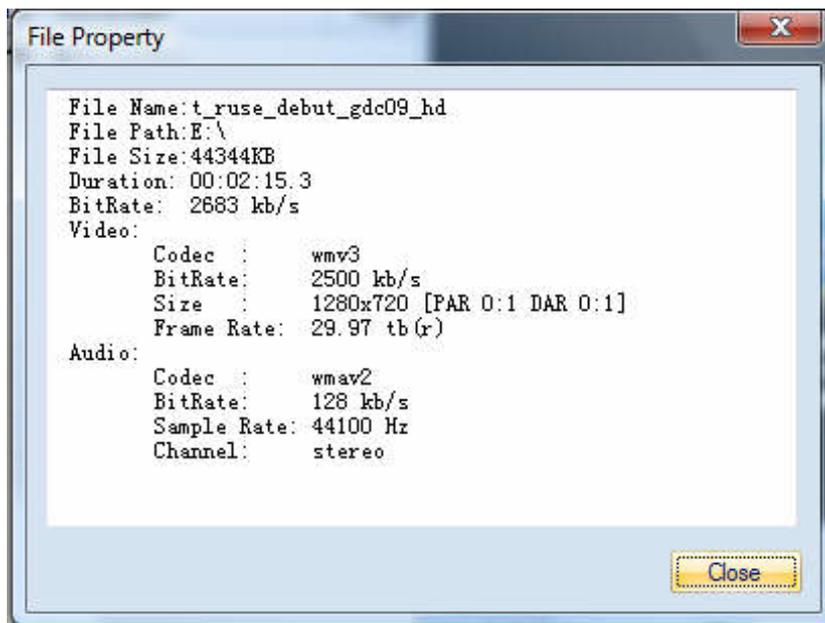

Preview and play video files

Choose a file in the file list area, and then click the "Play" button, you can preview and play video files .

File Property

Choose a file in the file list area, and right click, in the menu, click "Property" to show the infomation of the file.

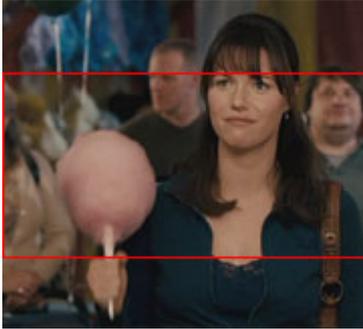

Screen Crop / Pan

There are two kind of video by screen scale in the main: Normal Screen and Wide Screen.

Normal Screen generally means 4:3 (width:height), and Wide Screen means 16:9, and there're many other video aspect ratios (e.g 2.35:1, 5:4, 11:9, 15:9, 16:10).

Then there's a problem coming up: what you should do when convert video from different video aspect tatioos?

Well, we offer 7 options to do converting like this, you may choose the following crop modes based on your personal preference.

Screen Crop / Pan options	Wide Screen --> Normal Screen	Normal Screen --> Wide Screen
<p>Mode 1: Stretch to fullscreen (image distorted)</p>		
<p>Mode 2: Crop to fullscreen (Pan & Scan)</p>	 	 
<p>Mode 3 (Recommended): Align center with blank (letterbox)</p>		

Mode 4:
Align left with blank (for special
purpose)

Mode 5:
Align right with blank (for special
purpose)

Mode 6:
Align top with blank (for special
purpose)

Mode 7 :
Align bottom with blank (for special
purpose)

Set the start time and stop time

If you want to convert a file just for a snippet, then you will need this function.

Here you can convert just a part of a media file by setting the start time and stop time.

To do this, choose the file in the list, then you can write the start time and stop time in the text area. See sketch map below:
